CAPABILITIES:

- Tank ammunition (105mm, 120mm)
- High explosive artillery (155mm)
- Large caliber mortars (81mm, 120mm)
- Insensitive munitions
- Smart munitions mines/scatterable mines
- Missile assembly/missile warheads
- Rocket-assisted projectiles
- Detonators
- Test Ranges
- Medium Caliber (40mm)
- SPIDER Grenades
- M112 Demo Charges
- MICLIC
- Mortars (60mm, 81mm, 120mm)
- Development
- Pressed and cast warheads
- Salute Rounds (75mm, 105mm)

HISTORY: The IAAAP was established in November 1940, as the Iowa Ordnance Plant and started production in 1941. Production was stopped in 1945, when World War II ended. In 1947, the U.S. Atomic Energy Commission assumed responsibility. The plant resumed its ammunition manufacturing mission in 1949. In 1950, in response to the Korean conflict, production increased dramatically. In 1975, responsibility for the IAAAP reverted back to the Army.

ENVIRONMENTAL: IAAAP was placed on the Environmental Protection Agency's National Priority List (Superfund) in 1990. The plant has soil and groundwater contamination involving solvents, explosives and metals.

STATISTICS: Iowa has a government staff of one Soldier and 23 Department of the Army civilians to provide contract oversight. The government staff has a payroll budget of \$2.3 million. Contractor statistics are considered proprietary and therefore are unavailable.

FACILITIES: IAAAP is housed on 19,011 acres with 767 buildings, 271 igloos and storage capacity of 1,100,775 square feet. It also has 143 miles of roads and 102 miles of railroads.
