

COMMANDER:

Col. Gabriel W. Pryor

PUBLIC AFFAIRS OFFICER:

Julia Hawkins julia.m.hawkins10.civ@army.mil

Phone: 918-420-6591

ADDRESS:

McAlester Army Ammunition Plant
ATTN: JMMC-PA, 1 C Tree Road
McAlester, Okla. 74501-9002

MISSION:

The McAlester Army Ammunition Plant (MCAAP) mission is to receive, store, ship, produce, renovate, and demilitarize conventional ammunition. MCAAP provides Centralized Ammunition Management for training ammunition and contingency stocks for Army units in the southwest region of the U.S.

FORCE MULTIPLIER:

The McAlester Army Ammunition Plant (MCAAP) is a vital cornerstone of our nation's defense infrastructure, ensuring that America's military is equipped and ready for any challenge. From receiving, storing, and shipping conventional ammunition to producing, renovating, and demilitarizing it, MCAAP executes every aspect of its mission with precision and purpose. As the provider of Centralized Ammunition Management for training and contingency stocks for Army units across the southwest region, MCAAP stands as a steadfast partner to the warfighter, delivering the resources necessary to maintain readiness and protect our national security.

MCAAP's work is a testament to the ingenuity and dedication of the men and women who keep America's military prepared for the complexities of modern warfare. Its ability to safely demilitarize obsolete ammunition and renovate existing stock exemplifies both responsibility and innovation, maximizing resources while ensuring safety and environmental stewardship. For the American public, MCAAP symbolizes the behind-the-scenes efforts that strengthen our nation's defense and safeguard the freedoms we hold dear. Through this mission, MCAAP reinforces the foundation of America's military strength, ensuring that those who serve are equipped to defend liberty today and for generations to come.

CAPABILITIES:

- Load, Assemble, Pack (LAP) (Bombs, Projectiles and Warheads)
- Extensive Logistics Support and Massive Storage Capacity
- Demilitarization/Disposal to include Resource, Recovery, Reuse (R3) and a Deactivation Furnace
- Maintenance, Renovation, Testing (Missiles)
- Mobile Ammunition Renovation, Inspection, and Demilitarization Team
- Safety and Environmental Protection
- Research and Development
- Mobile Railroad Maintenance Team

HISTORY:

In 1940, Congress responded to the President's call for a Navy large enough to meet any potential combination of hostile forces and authorized the "Two Ocean Navy." To answer that demand, Naval Ammunition Depot-McAlester was commissioned to support western coastal facilities. The depot was originally built and operated exclusively by and for the Navy. In 1943, the depot's mission was to produce, store, and ship ammunition, bombs, and mines for the Navy's ships and aircraft. In 1975, the DOD issued a directive which assigned the Army as the Single Manager for Conventional Ammunition. In 1977, the depot was transferred to the Army and renamed the McAlester Army Ammunition Plant. Under Base Realignment and Closure 2005 actions, MCAAP acquired the Sensor Fused Weapon and missile warhead production mission from Kansas Army Ammunition Plant. It also acquired demilitarization, storage, and maintenance missions from three other installations that were closed. Today, MCAAP is a unique, major multi-mission installation with all normal base functions. MCAAP is a Government-Owned, Government-Operated installation.

FACILITIES:

MCAAP is housed on more than 45,000 acres with more than 2,600 buildings, including more than 2,260 earth-covered magazines, 163 storage warehouses and storage capacity of 6.3 million square feet.
