Radford Army Ammunition Plant

Commander's Environmental Stewardship Challenge

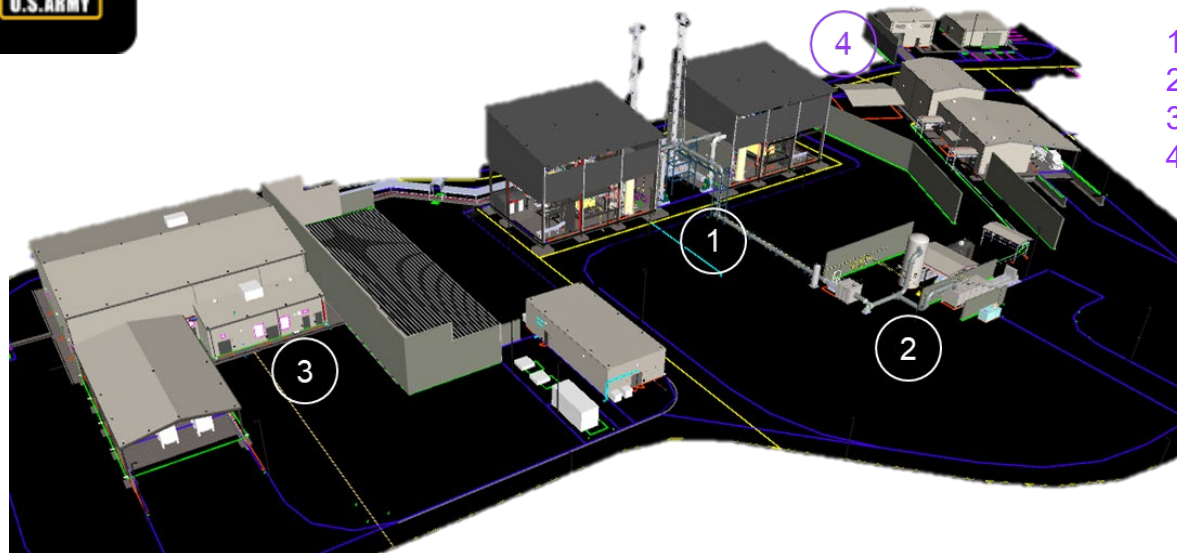

With specific challenge to:

- ☒ Immediately reduce lead from the open burn ground
 - Began sawing MK-90 grains
- ☒ Reducing waste treated at open burn ground by 50%; New EWI treat 95% of current waste
 - Received permit modification to saw other grains
- ☒ Reduce waste, water, and power consumption as low as reasonably achievable
 - Water use reduction
 - River water intake variable drive
 - Reduce by 1 billion gal/yr
- ☒ Reduce the amount of nitrates released into the New River
 - New nitrocellulose plant
- ☒ ISO 14001
 - Completed Surveillance Audit in October
 - Have made substantial reductions in immediately reportable events
- ☐ ISO 50001
 - Will commence energy assessments of the compressed air and steam distribution

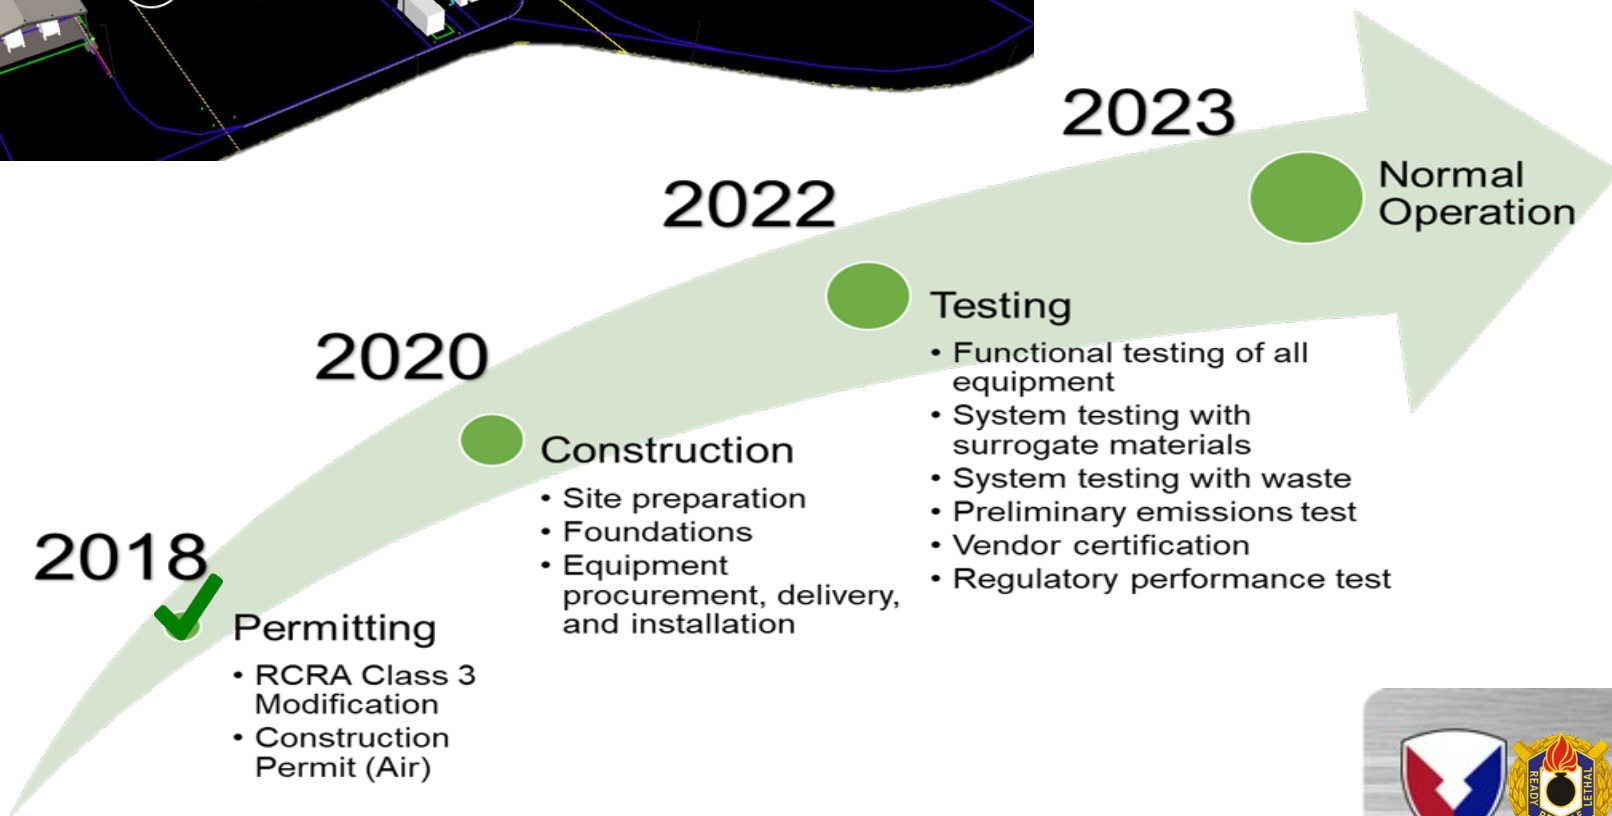

Energetic Waste Incinerator

1. Rotary kiln incinerators
2. Contained burn and decontamination chamber
3. Grinder building
4. Control room and maintenance building
