JMC provides the conventional ammunition life-cycle functions of distribution, storage, demilitarization, and production of munitions of all U.S. military services, other government agencies, and Allied nations as directed. JMC is the logistics integrator for life-cycle management of ammunition, providing a global presence of technical support to frontline units.

JMC’s mission is to provide the Joint Force with ready, reliable, lethal munitions at the speed of war sustaining global readiness. JMC serves as the Field Operating Activity for the Single Manager for Conventional Ammunition. As such, JMC is responsible for ammunition storage and surveillance, distribution, demilitarization and production for the Department of Defense.

JMC provides bombs and bullets to America’s fighting forces across all military services. JMC manages ammunition plants that produce millions of rounds of ammunition annually and storage depots that receipt, store and issue training and combat munitions. JMC is headquartered at Rock Island Arsenal, Ill. and employs 23 military personnel, more than 5,000 Civilian personnel, and more than 5,000 contractors across the nationwide network of ammunition installations.

CORE COMPETENCIES:
- Distribute
- Store
- Demilitarize
- Produce

The world leader in programs to store, treat & dispose of chemical weapons safely and effectively. CMA has the storage mission at the Nation’s final two chemical weapon stockpile sites.

Both sites ensure the safe and secure storage of the chemical weapons stockpile until demilitarization is complete.
